Now, abortion is to be a human right throughout the whole EU.

An abortion is a medical procedure that ends a pregnancy. We believe all women should have the right to make the choice concerning their bodies.

Until recently, not every woman in the EU had access to legal abortion.

On the 11th of april, the process of legalized abortion in Europe began. In a month the EU parliament will vote on whether or not abortion should be a right for everyone.

why should the few people in power decide whether or not women should have the opportunity to get a medical procedure that can change a woman's life completely. Why can't a woman just decide over her own body, instead of other people that have nothing to do with their life, decide over them.

let us strive to create a world where access to safe and legal abortion services is not only protected but actively promoted. Let us amplify the voices of those whose stories are often silenced, and let us work together to ensure that reproductive rights are upheld as fundamental human rights for all.
